CEO comments on performance in the first half

Continued positive performance

Following a strong first quarter of 2015, Ratos's positive performance continued during the second quarter. Our companies performed well with an increase in adjusted operating profit of +14% in the second quarter (+22% so far this year). We are continuing to harvest the fruits of the change and development programmes carried out and which form the core of our business model: to change and develop companies and sectors.

The first half of the year saw a high level of transaction activity with two successful exits and one attractive acquisition. The sale of Nordic Cinema Group was completed in July and provided an IRR of a strong 41%. We sold an additional part of our holding in Inwido, which after a positive price trend for Inwido shares provided an exit gain of SEK 236m. In June we signed an agreement to acquire Speed Group, a fast-growing Swedish logistics services supplier which faces an exciting development journey.

Unchanged market situation

In the first half of this year we continued to see a relatively mixed market scenario for Ratos's companies, which operate in many different sectors and geographic markets. In Mobile Climate Control (MCC), for example, we saw increased demand in the North American bus and off-road vehicle market in the first half, while Aibel continued to experience a weak offshore market. Several of our companies operate in growing market segments. Nebula and Ledil, for example, can see clear structural growth in their markets. For Ratos's companies as a whole the overall market scenario is unchanged with a relatively stable market situation.

Strong performance for Ratos's companies

The wide range of companies that Ratos owns means that as usual we have companies showing a strong performance, individual companies with a weaker performance and a few in between. This is a natural part of our business model – to develop and create successful and sustainable companies – and the companies are at different phases of their development journey.

If we sum up Ratos's companies, overall they showed strong development in the first half of 2015. Operating profit (EBITA), both reported and adjusted (for items affecting comparability), rose +22%. This improvement is primarily an effect of the development initiatives with which the companies are working while positive currency effects also contribute. Our development work focuses on long-term value creation and performance should therefore be viewed over time and not just in individual quarters.

In the first half, DIAB stands out with a very strong start to the year. Rising volumes, gains in market share, improved internal efficiency and, to some extent, positive currency effects provided a good earnings trend. It is gratifying to see that DIAB is now once again in a strong position after a tough

restructuring that started in 2012. DIAB provides a good example of how we as an active owner with commitment and patience can reverse a negative trend and create value over time

MCC also had a strong first half due to successful sales work which was underpinned by a somewhat stronger market. HENT continues to show growth and good project management which provides favourable and stable profitability. Ledil continues to show good growth in all geographies and has exciting opportunities going forward. Nebula, Nordic Cinema Group and Inwido are also examples of positive development.

For the companies whose performance is weaker, the first half overall was also a step in the right direction. Aibel's recently awarded major contract for the Sverdrup field is a significant success even though prospects in the MMO market remain uncertain. Hafa Bathroom Group reports a growth quarter which is highly positive after a long period of falling sales.

Strong transaction market

The transaction market was strong at the start of 2015. There is major demand for attractive acquisition candidates and a lot of capital hunting for returns. This also applies on the stock exchange with good opportunities for IPOs. Access to bank financing is also good.

For Ratos this means that at present it is easier to sell companies than to acquire them. If we take a look back, however, the pendulum has always swung to and fro and Ratos's business model over time has been able to both manage and exploit these fluctuations in the transaction market. So for us this is an entirely natural part of our business even though at present it means that we are working harder than usual on the acquisition side since more effort is required to find the gold nuggets. In a market situation like this it is also particularly important to keep a cool head.

Acquisition of Speed Group

In June, Ratos agreed to acquire Speed Group, which provides logistics services and has seen strong development in recent years with high growth and good profitability. Demand for effective logistics solutions is rising continuously and Speed Group has an attractive position that Ratos wants to further develop in partnership with the company's founders and management. We see major potential for Speed Group to continue to grow and capture significant market share in Sweden. The acquisition is expected to be completed in the third quarter.

Two exits

As reported previously, Ratos signed an agreement in April on the sale of Nordic Cinema Group to Bridgepoint. The sale was completed in July and was a fantastic deal for Ratos, with an IRR of 41% and an exit gain of approximately SEK 900m. In April, we also sold some of Ratos's shares in Inwido through a placement of approximately 21% of Inwido. Due to good share price development of +31% since the IPO in September 2014, this provided an exit gain of SEK 236m. In total, Inwido has thus provided an exit gain of approximately SEK 1,420m and an IRR of 16%.

After completed exits, Ratos has a strong financial position with cash of approximately SEK 4.3 billion, after completion of agreed transactions.

Unchanged positive view of 2015

Taken overall, the first half of the year developed as expected with an unchanged market scenario and a positive trend in the portfolio of companies. Our cautious macroeconomic view for the full year 2015 remains unchanged while we expect the transaction market to remain strong. For the portfolio of companies we owned at the end of the second quarter, we have an unchanged positive view and our assessment remains that conditions exist for a higher operating profit (adjusted for the size of Ratos's holdings) in 2015.

Note 1 Accounting principles in accordance with IFRS

The consolidated financial statements are prepared in accordance with International Financial Reporting Standards (IFRS). The interim report is prepared in accordance with IAS 34, Interim Financial Reporting. Pertinent regulations in the Swedish Annual Accounts Act are also applied.

The parent company's interim report is prepared in accordance with the Annual Accounts Act, which is in accordance with the regulations in RFR 2 Accounting for Legal Entities. IFRS requires uniform accounting principles within a group. The IFRS standards and issued interpretations applied in this interim report are those endorsed by the EU until and including 31 December 2014. The new and revised IFRS standards which came into force in 2015 have not had any material effect on the Ratos Group's financial statements. This means that the same accounting principles and basis of calculation are applied for the Group and the parent company as those used in preparation of the 2014 Annual Report.

Note 2 Risks and uncertainties

Ratos invests in and develops unlisted companies in the Nordic region. These operations include inherent risks attributable to both Ratos and the holdings. These mainly comprise market, operational and transaction risks and can include both general risks, such as external factors and macroeconomic development, as well as company- and sector-specific risks. Ratos's future earnings development is dependent to a large extent on the success and returns of the underlying holdings which is also dependent, among other things, on how successful those responsible for the investments and each holding's management group and board are at developing and implementing value-enhancing initiatives.

Ratos is also exposed to various types of financial risks, primarily related to loans, trade receivables, trade payables and derivative instruments. The financial risks consist of financing risks, interest rate risks, credit risks and currency risks.

It is also essential that Ratos has the ability to attract and retain employees with the right skills and experience.

A more detailed description of the material risks and uncertainties to which the Group and the parent company are exposed is provided in the Directors' report and in Notes 30 and 37 in the 2014 Annual Report. An assessment for the coming months is provided in the CEO comments on performance in the first half on pages 3-4.

Note 3 Business combinations

Acquisitions

Speed Group

Ratos has signed an agreement to acquire approximately 70% of the shares in Speed Group, a fast-growing Swedish logistics services supplier. The purchase price (enterprise value) for 100% of the company amounts to approximately SEK 450m, of which Ratos will provide equity of approximately SEK 300m. The acquisition is subject to approval by the relevant authorities and is expected to be completed in the third quarter.

Acquisitions in subsidiaries

In the second quarter, Arcus-Gruppen acquired 90% of the shares in Social Wines (formerly Modern Fluids). The acquisition is in line with Arcus-Gruppen's strategy to increase market share in Finland.

In the first quarter of 2015, Bisnode acquired Octopus System in the Czech Republic. The intention is to strengthen Bisnode in the Czech market. In the same quarter, Nordic Cinema Group, via a subsidiary, acquired all the shares in Ski Kinosenter AS. The acquisition is in line with SF Kino AS's strategy to establish itself in the Oslo market.

Divestments

In April, Ratos sold 20.9% of the total number of shares in Inwido AB (publ). The sale was made at a price of SEK 91 per share, a total of SEK 1,103m, and provides an exit gain of SEK 236m. Following the sale, Ratos owns 10.4% of the shares in Inwido. Ratos's assessment is that even after the partial divestment the Group has a significant influence over Inwido despite the Group then owning less than 20% of the shares. This is due to an assessed unchanged influence and continued representation on the board. Inwido will therefore continue to be classified as an associate.

Subsidiary divestment after the end of the reporting period
Ratos signed an agreement on the sale of its subsidiary Nordic Cinema
Group in April. The sale was completed in July. The exit gain amounted
to approximately SEK 900m. Nordic Cinema Group is recognised as Assets
held for sale in the consolidated statement of financial position at 30 June
2015.
